INSTRUCTIONS FOR USING **OFFLINE ACTIVATION STEAM**

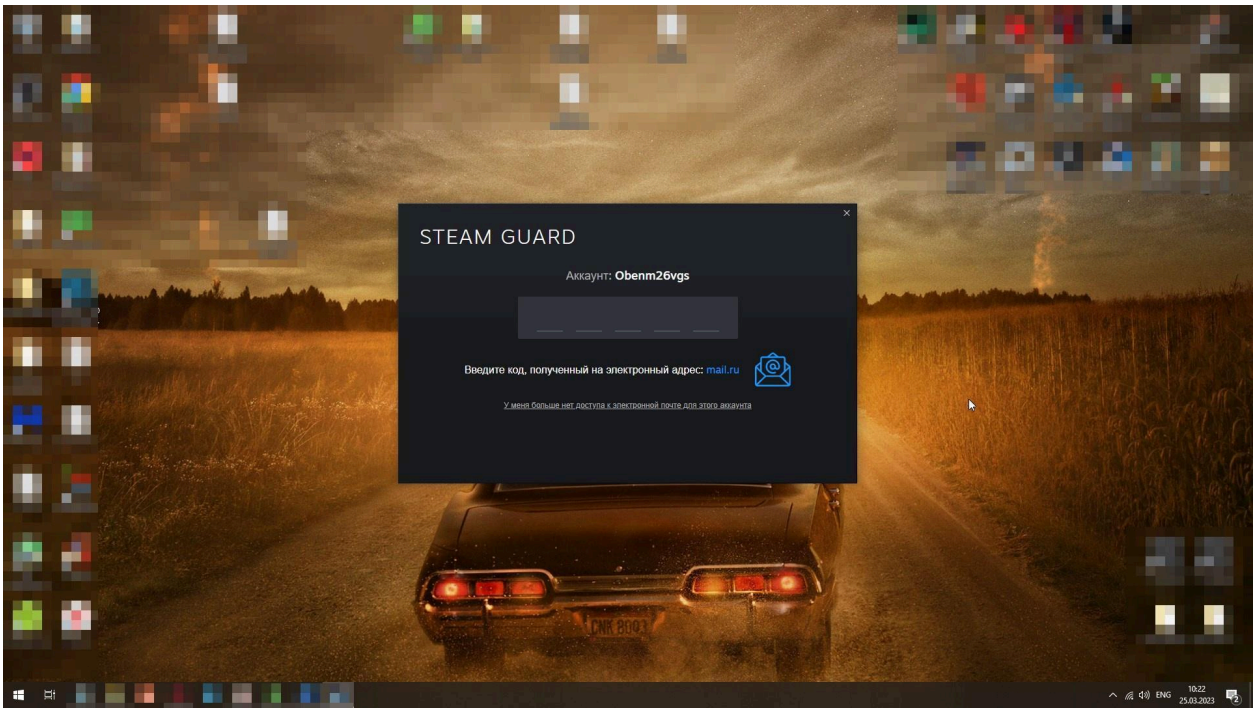
YOU ONLY PLAY OFFLINE ON THE BOUGHT ACCOUNT

At the bottom of the instructions are the types of errors and their solutions!

INSTRUCTION:

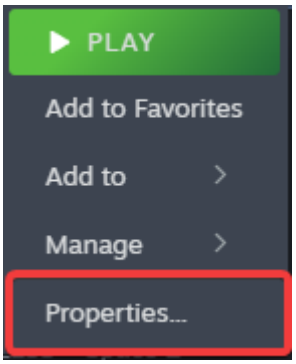
№1. After the purchase you received data from the account login:password, you need to enter them when logging in to Steam (run ONLY through the application)

№2. Then send a screenshot of the screen to the seller in the chat and enter the received code.
If it gives an error, enter same code again.

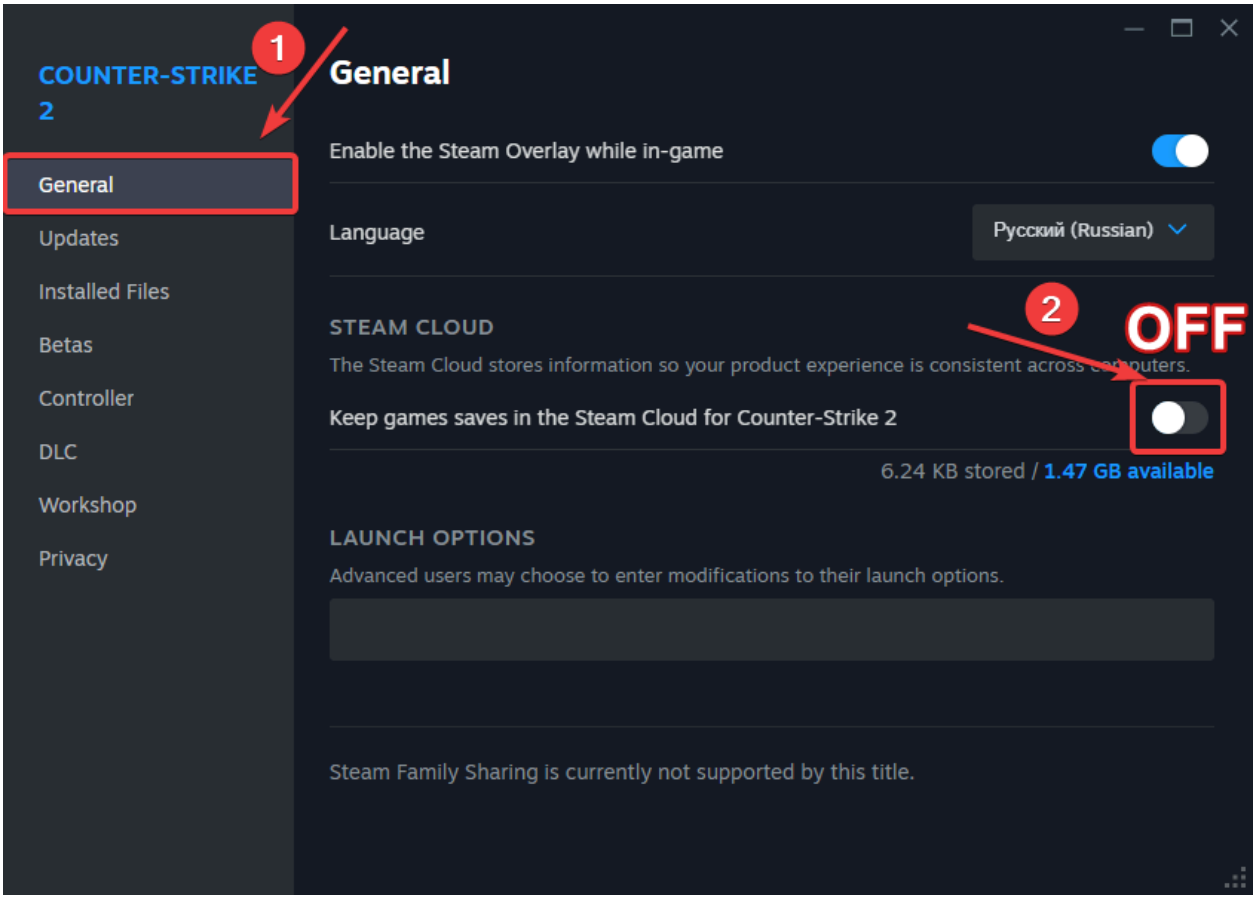


DISABLING GAME UPDATES

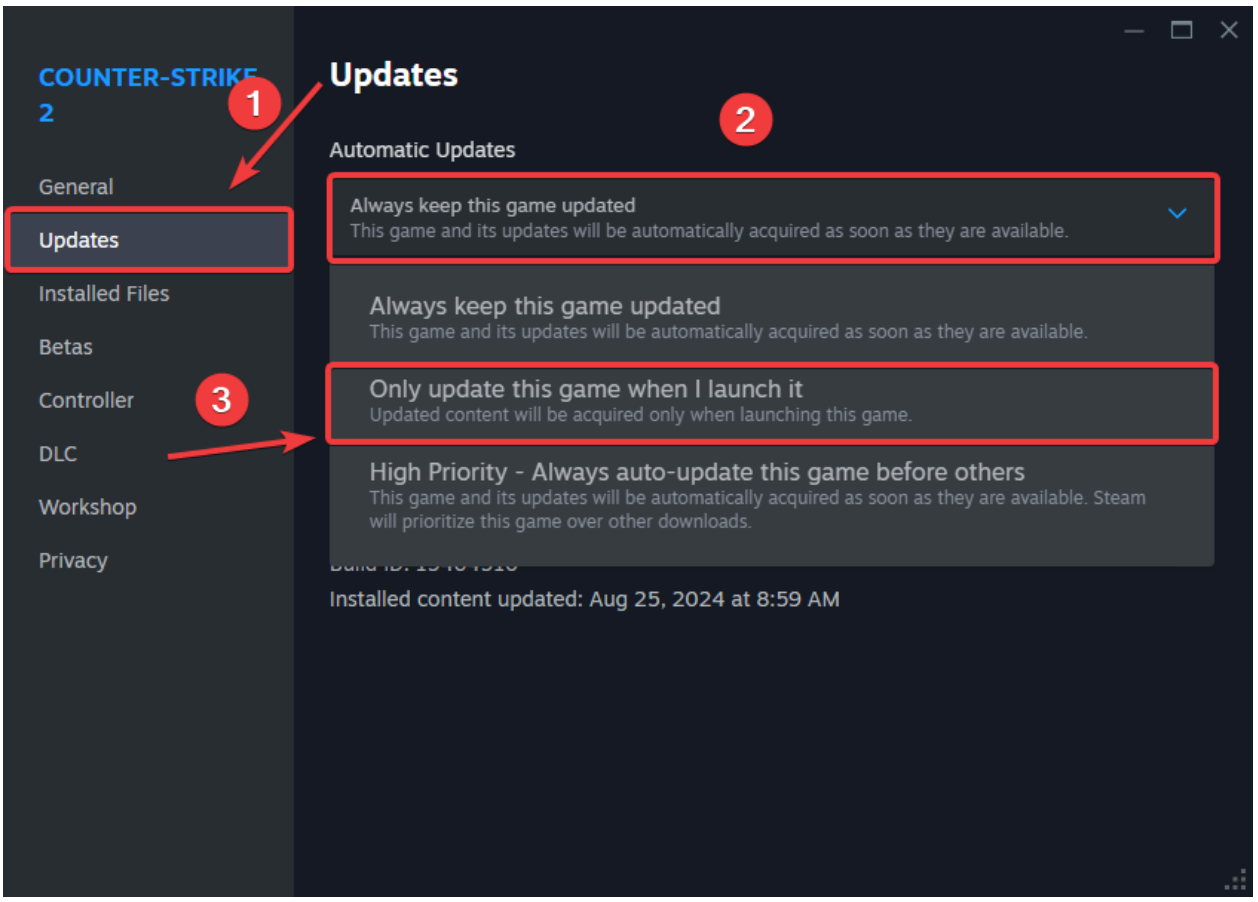
№3. Click on the game via RMB and select “**Properties**”



№4. In the “**General**” section, disable synchronization of saves with Steam Cloud



№5. Go to “Updates”, click on “Always update the game” and set “Update only before launch”

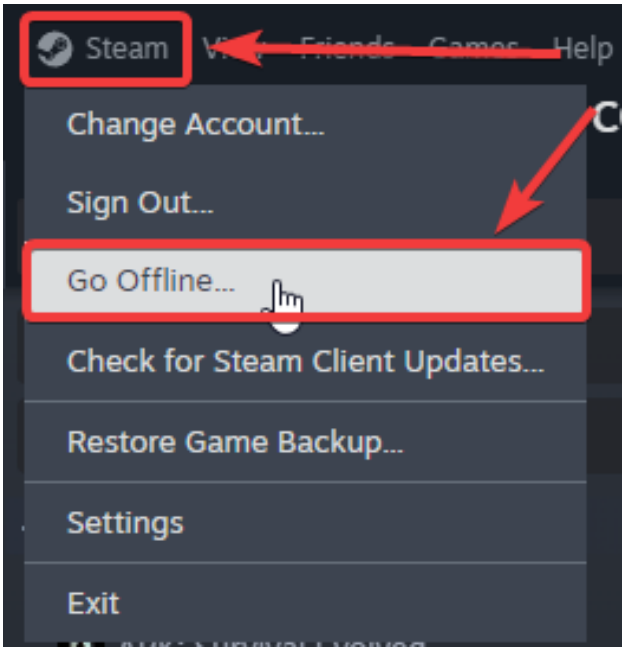


№6. Then, put the game on download and perform the first launch of the game via **ONLINE**!

If it asks about selecting the type of saves, select **LOCAL**.

№7. You load up to the main menu of the game and close the game.

№8. Click on the top left of Steam - Go Offline



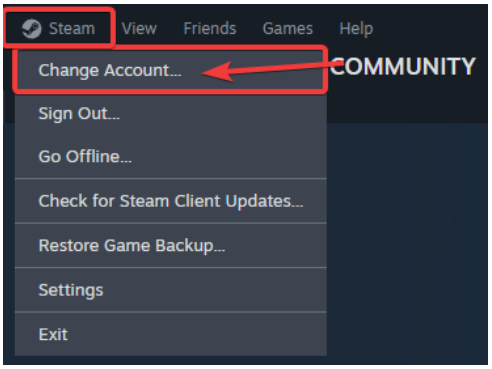
ALL SUBSEQUENT LAUNCHES ARE DONE THROUGH THE OFFLINE MODE!

THE CORRECT RE-ENTRY INTO THE ACCOUNT

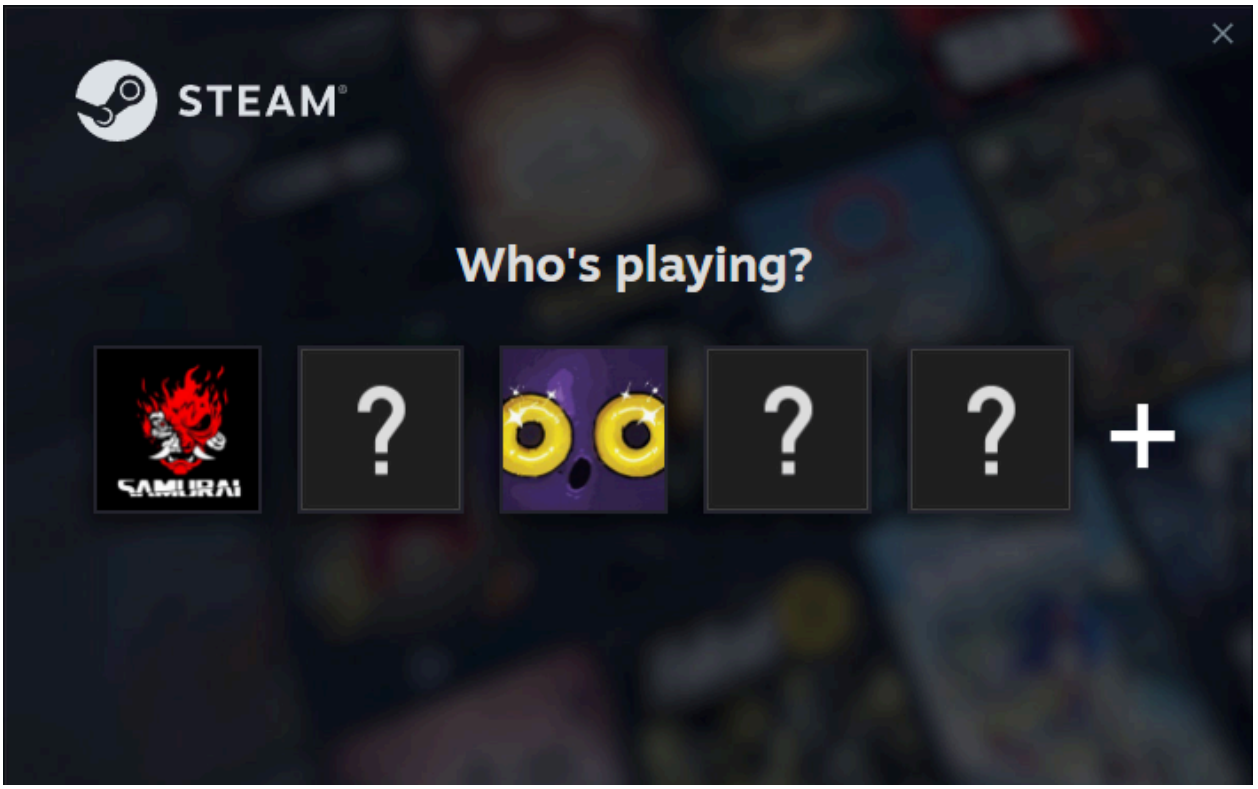
In order to re-log into your account and not need a code, you need to follow these steps:

№1. If you are thrown out from an offline account or you have transferred to your account, then you **do NOT need to enter your username and password again**. With this approach, you will be required to re-enter the code from the mail

№2. Click “Steam” - “Change account”

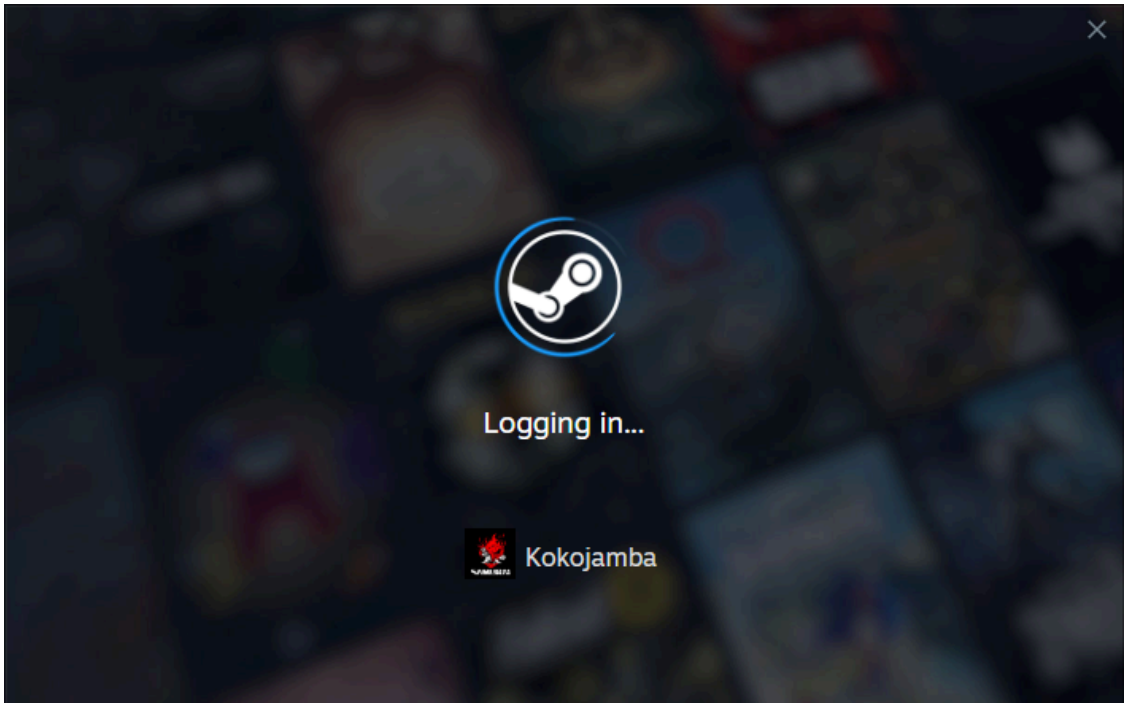


№3. You will have a window for selecting accounts (you will have other icons):



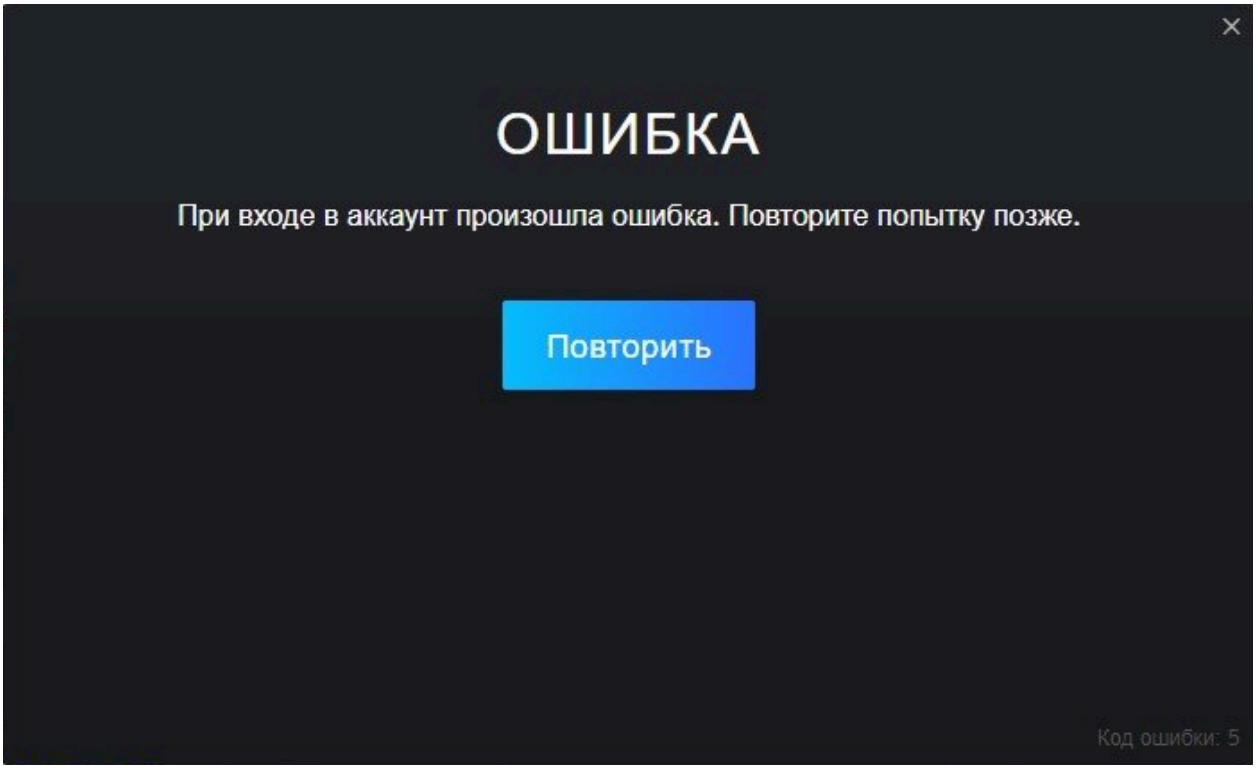
Hover over the account icon and select the one you need.

№4. After that, you will be logged into bought account without entering the code



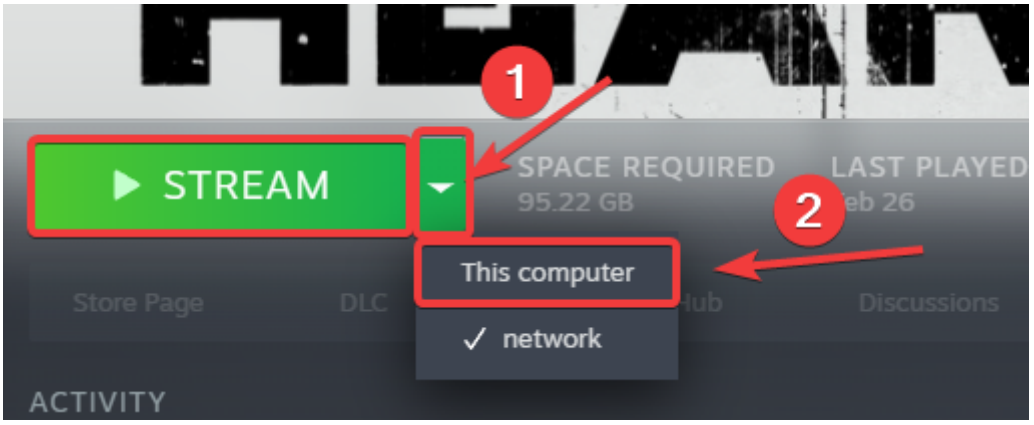
TYPES OF ERRORS

№1. If you get this error when you sign in to your account (error code 5)



Solution: You close steam and re-enter the code you received.

№2. If, when you first start it, it says "**STREAM**" instead of the "**Play**" button. Then click on the triangle on the right and select "**This computer**"



№3. If you get an error when you log in to the game, for example:

This is only possible at the first launch . After successful activation you will be able to run the game at any time in the future without delay!

Solution: In the day 5 activations on one account (a feature protection Denuvo) All people activate the game at random times (different speed internet and other reasons).

24 hours will not have to wait exactly, for example, if yesterday the buyer activated (went into the game) at 19:47, then today activation will appear at 19:48.

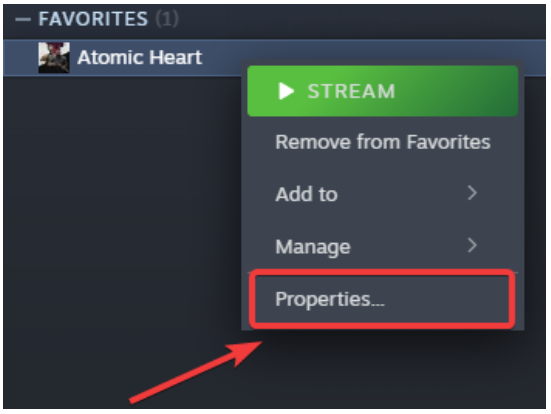
You can not log out from the account until you activate the game. Try to run at intervals of 50 minutes to 1 hour.

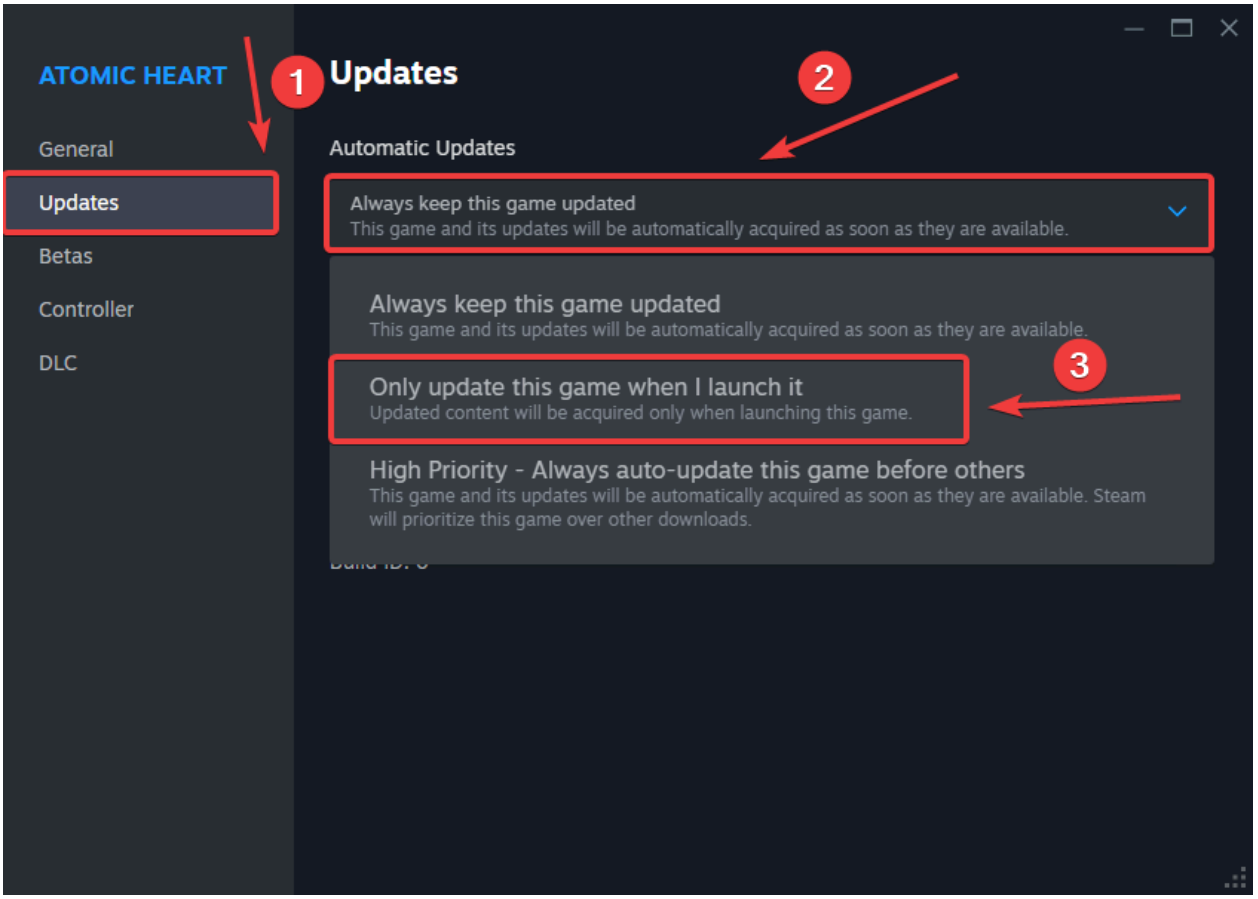
IN ORDER FOR THIS ERROR TO NO LONGER APPEAR, YOU NEED TO ADHERE TO THE FOLLOWING RULES:

1. Turn off ***WINDOWS*** updates
2. **DO NOT** update the game
3. Play **ONLY** VIA **OFFLINE MODE**

TURNING OFF GAME UPDATES

№1. Click on the game via RMB and select "Properties"





№2. Go to the item "Updates". Click on the item "Always keep … updated" and put "Only update … when I launch it"
